VITA-ANTIOXIDANT

- Many people don't get enough essential nutrition in their everyday diet. This problem can be detrimental to overall health.
- CellSentials provide optimal amounts of micronutrients, including exogenous antioxidants (ones found in food or supplements), to help keep your cells healthy. Most supplements can nourish your cells, but with InCelligence Complex, CellSentials a true innovation. It's made with U.S. patent-pending USANA InCelligence Technology. The InCelligence Complex contains 8 powerful ingredients:

- Resveratrol
- Quercetin
- Hesperidin
- Rutin
- Alpha-lipoic acid
- Green tea extract
- Meriva
- Olivol

PROTECT

- USANA InCelligence Technology enhances the protection of your cells by signaling them to increase the production of their own antioxidants.
- These are called endogenous antioxidants (ones naturally produced by the body), which are potentially hundreds of times more powerful in neutralizing free radicals than exogenous antioxidants.
- This helps your cells to better protect themselves.
